

Choosing an Acme Cloud Plan

Acme Cloud offers three subscription tiers designed for individuals, growing teams, and large organizations. Every tier includes encrypted storage, automatic backups, and access to the Acme Cloud web console.

The Starter tier is intended for a single user who needs a dependable place to keep documents and photos. It includes a generous storage allowance and the full set of sharing features, but it does not include the team administration console.

The Team tier adds shared workspaces, role-based permissions, and an administration console for inviting and removing members. Most small companies start here, because billing is consolidated into a single monthly invoice.

Storage, Backups, and Limits

Storage is measured per account, not per device, so connecting a second computer does not consume additional quota. Backups run automatically every night and are retained for thirty days on every tier.

The Enterprise tier removes the per-account storage cap and replaces it with a pooled allowance shared across the whole organization. It also adds single sign-on, audit logging, and a dedicated support contact with a guaranteed response time.

If you exceed your storage allowance, uploads are paused until you remove files or upgrade. Acme Cloud never deletes data automatically to enforce a limit.

Plan Comparison

Plan	Storage	Members	Price / month
Starter	100 GB	1	\$5
Team	1 TB	Up to 25	\$40
Enterprise	Pooled	Unlimited	Custom
